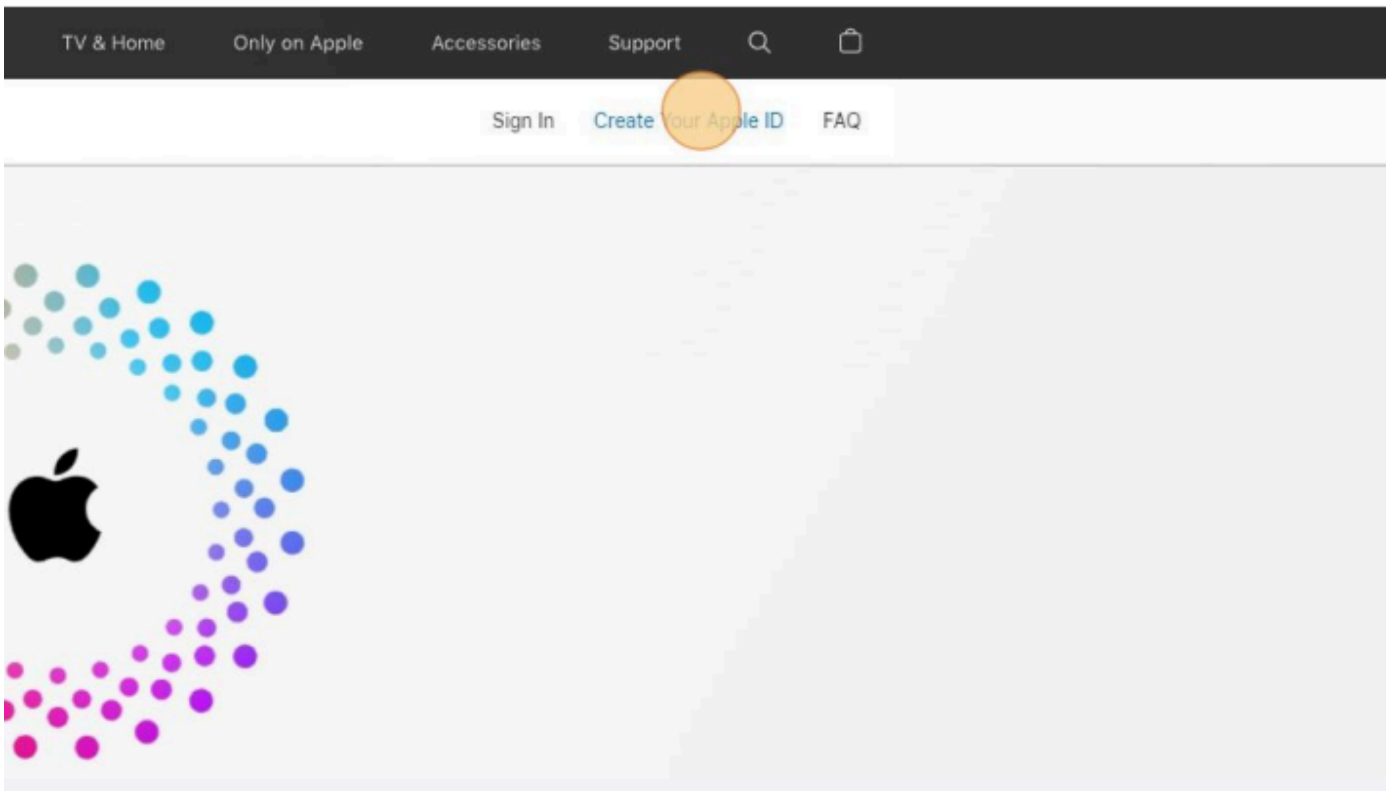
Creating Your Apple ID

Creating Your Apple ID

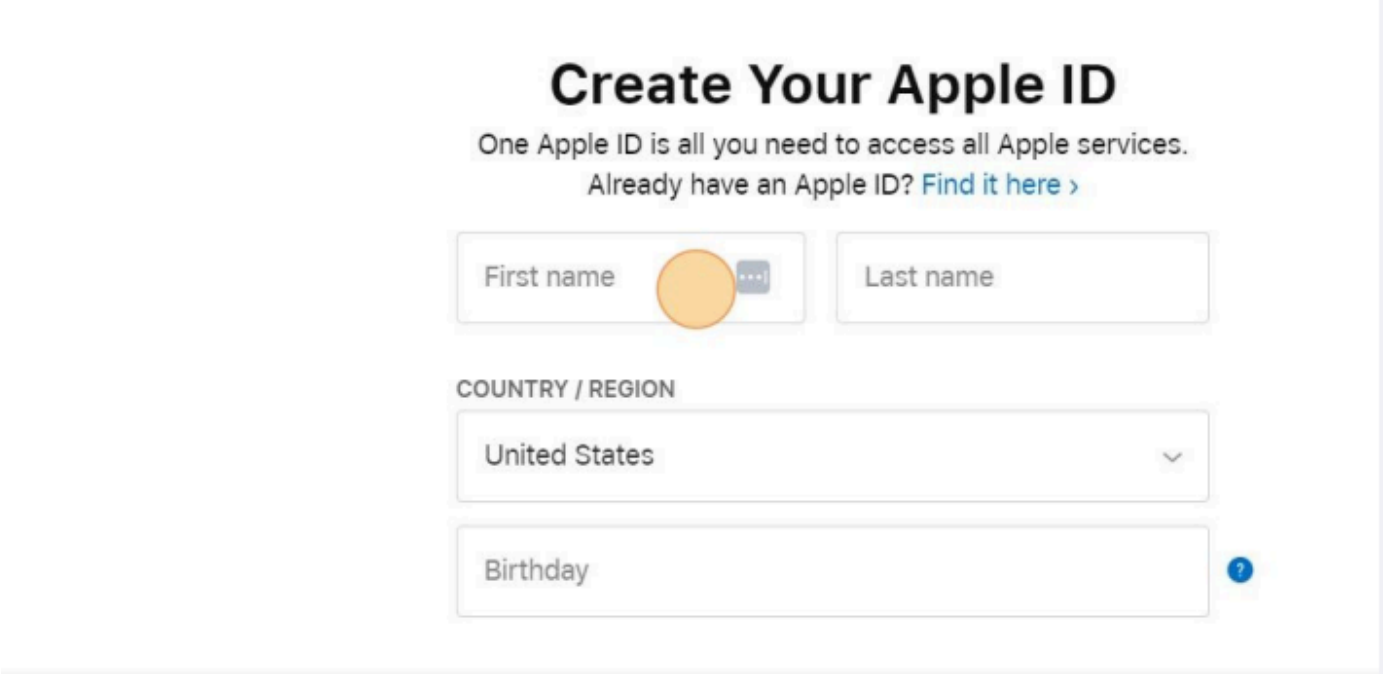
Before you can upload an app to the App Store, you'll need to create an Apple ID for your store. Just like youare required to have one for your personal iPhone, your store will need a separate one to enroll in the Apple Developer Membership Program.

PDFCreate your apple ID.pdf Download

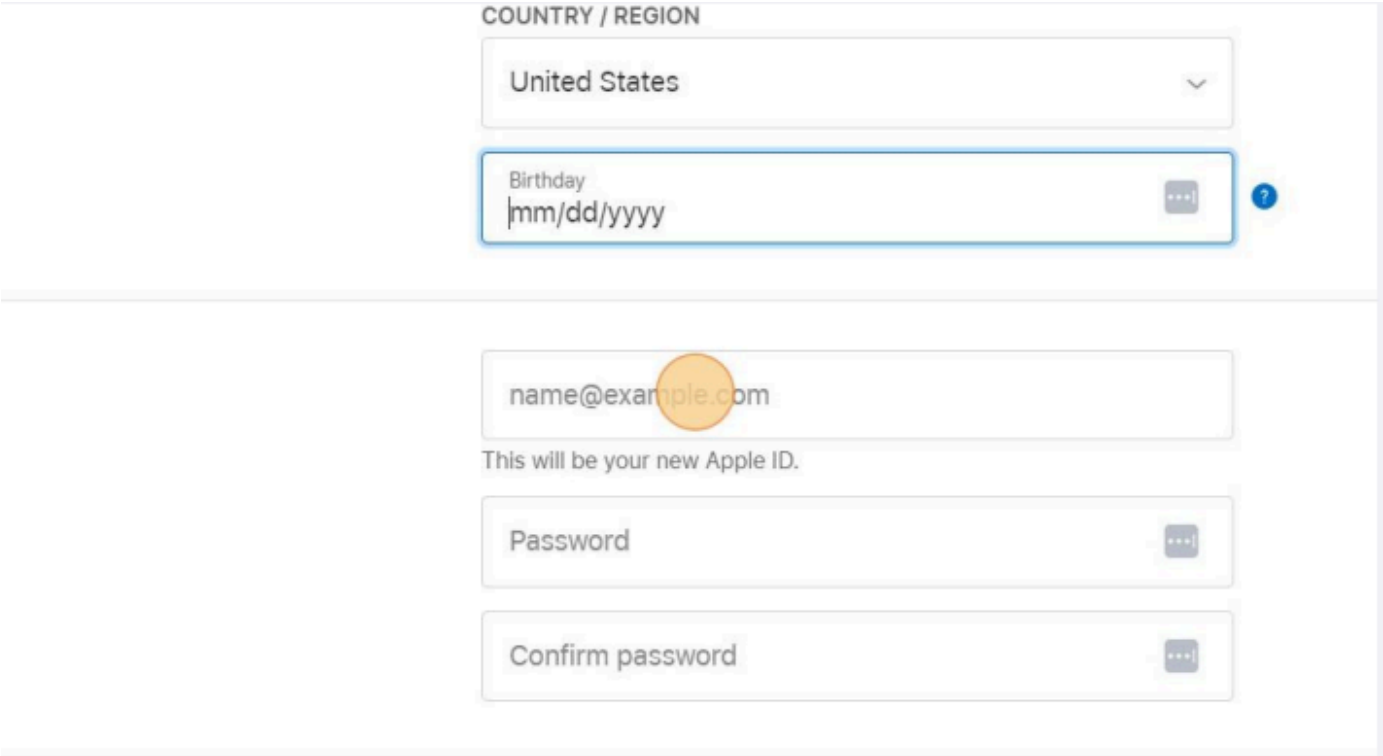
Go to appleid.apple.com



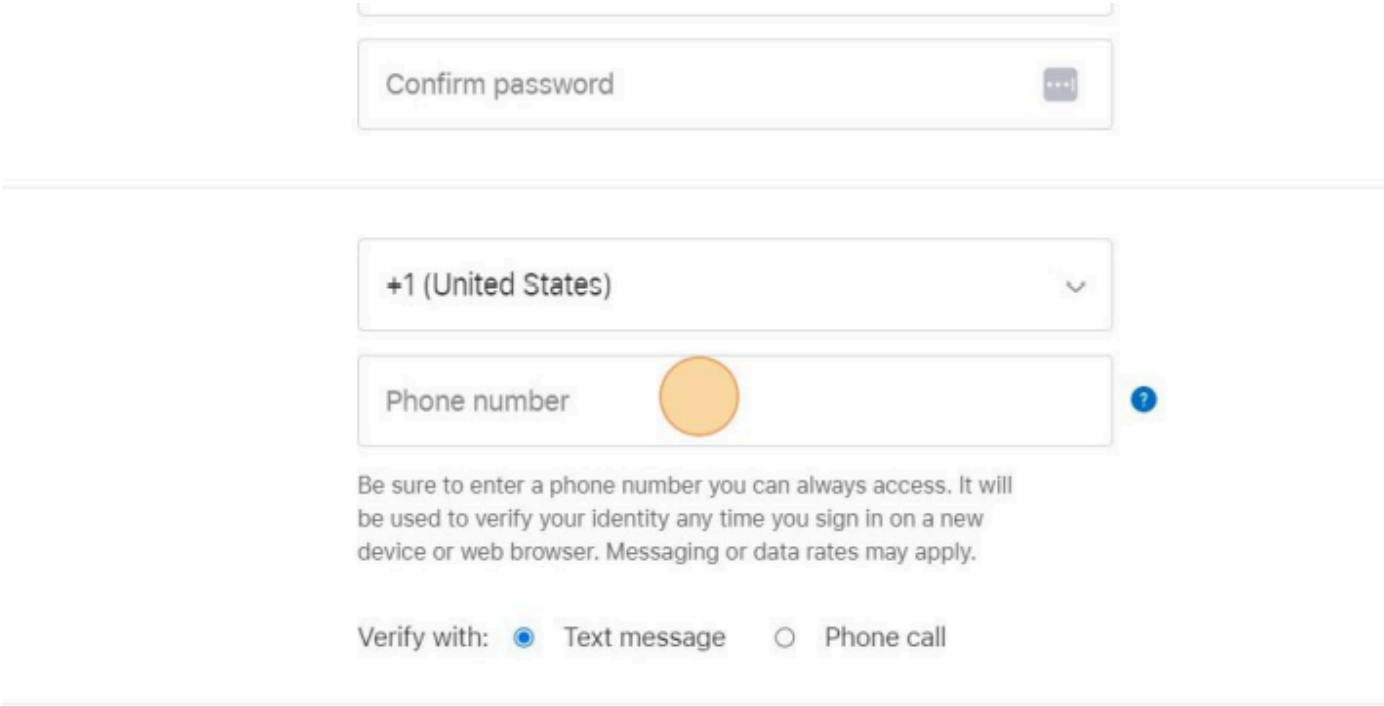
Select "Create Your Apple ID"



Enter the Birthday and First + Last name of the Owner. Be sure to match it verbatim to their Driver's License



For the Apple ID Email, use something related to the store. "Info@storename.com" works great, so does "Storename@gmail.com".



Lastly, you can use your own cell phone number in this field. Later on you'll be able to add multiple users phone numbers that you want to access the account.

Select CONTINUE, then you're done with this step!
