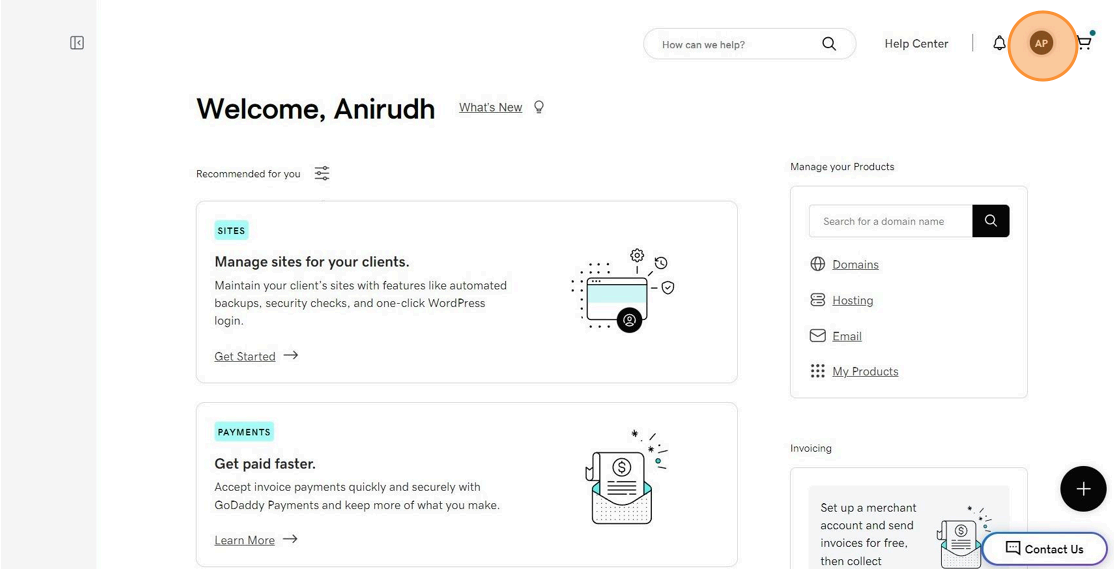
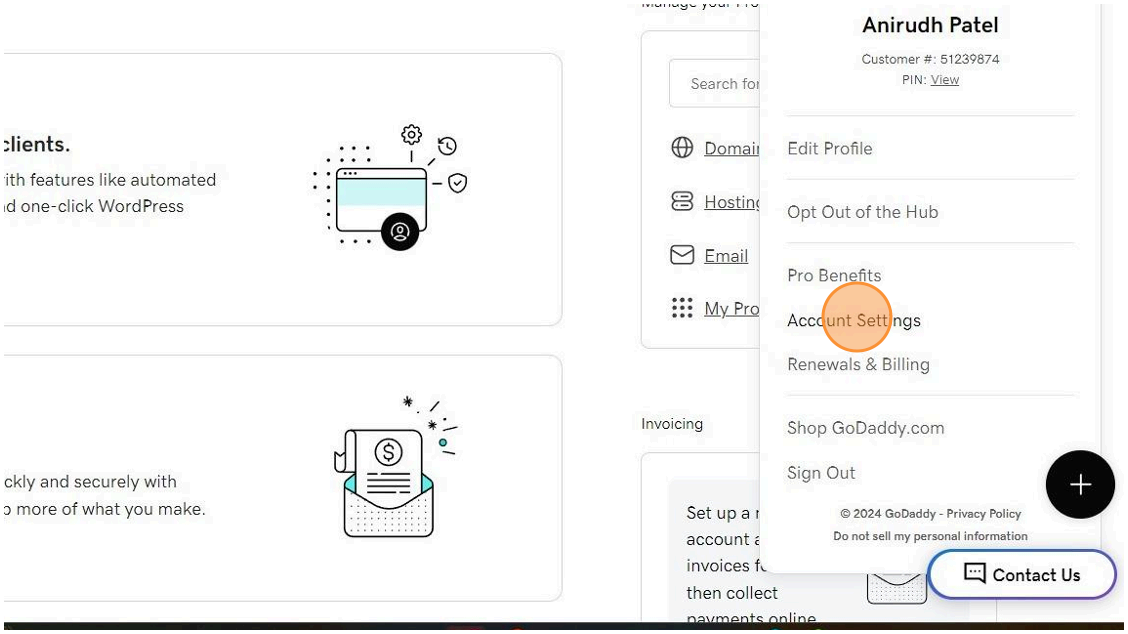
BOTTLECAPPS

Delegating Access in GoDaddy

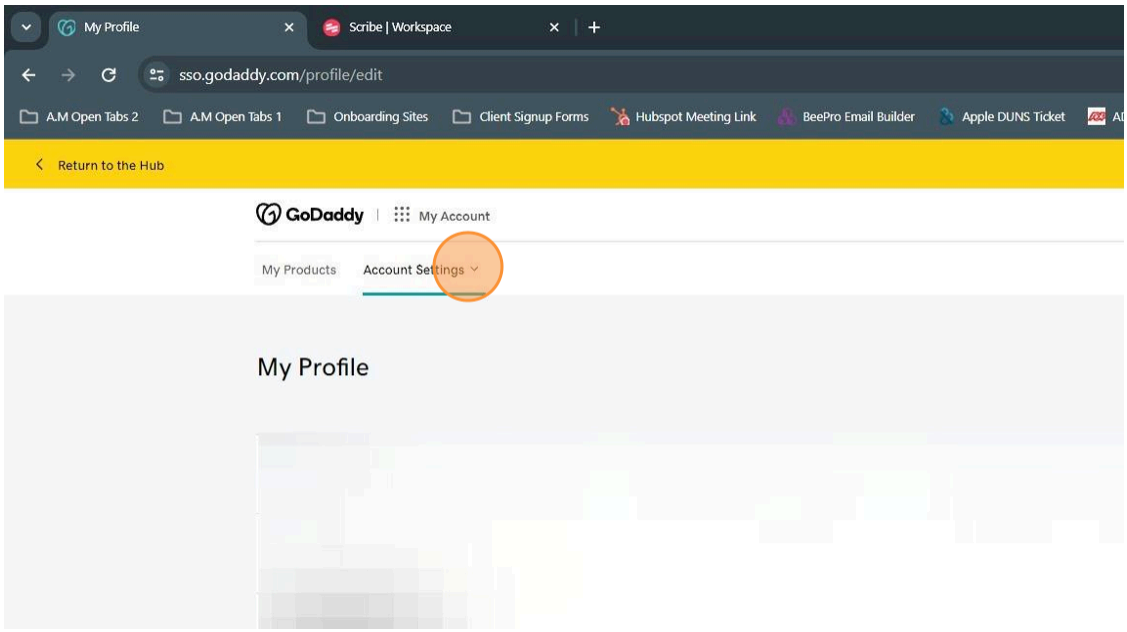
1. Once your domain is purchased, you'll see your initials at the top right corner. Click there.



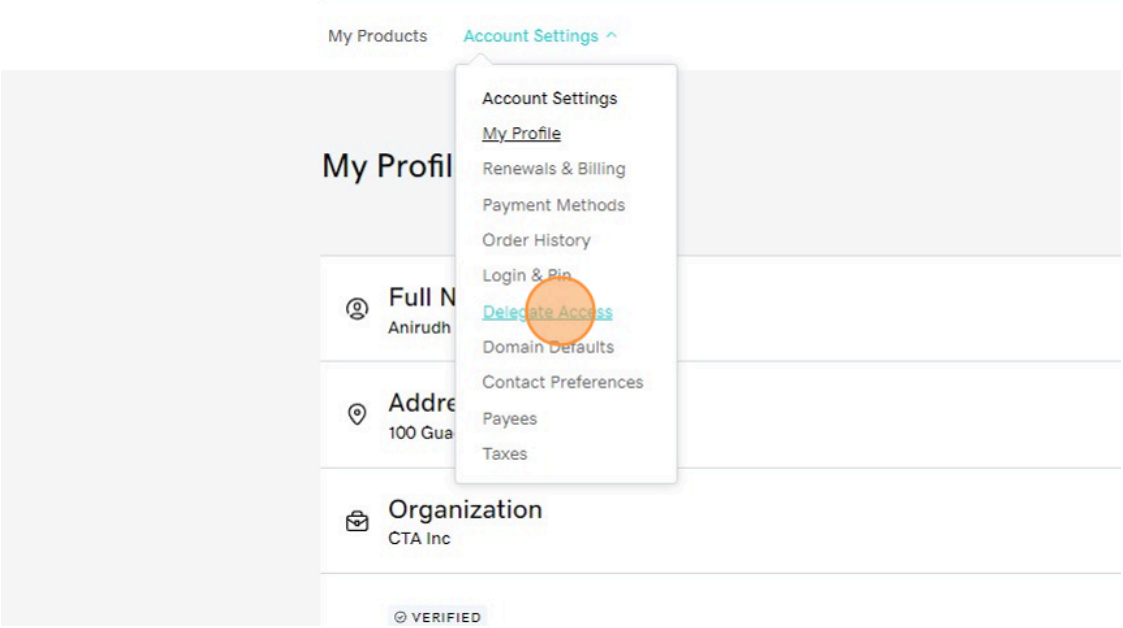
2. Click on Account Settings on the right-hand side dropdown.



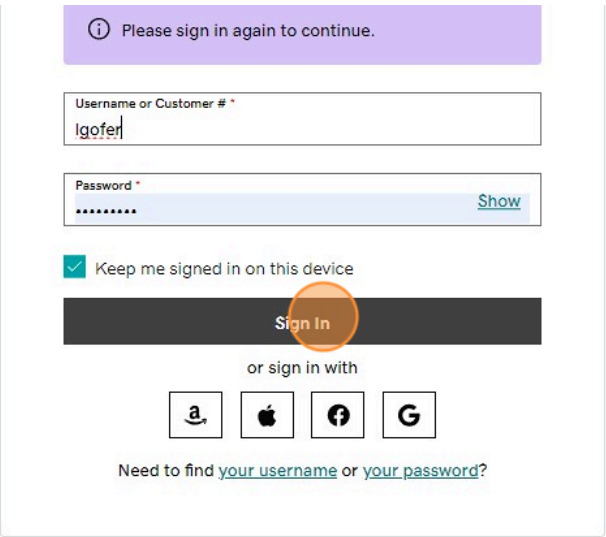
3. Select the new "Account Settings" dropdown at the top-middle of the page.



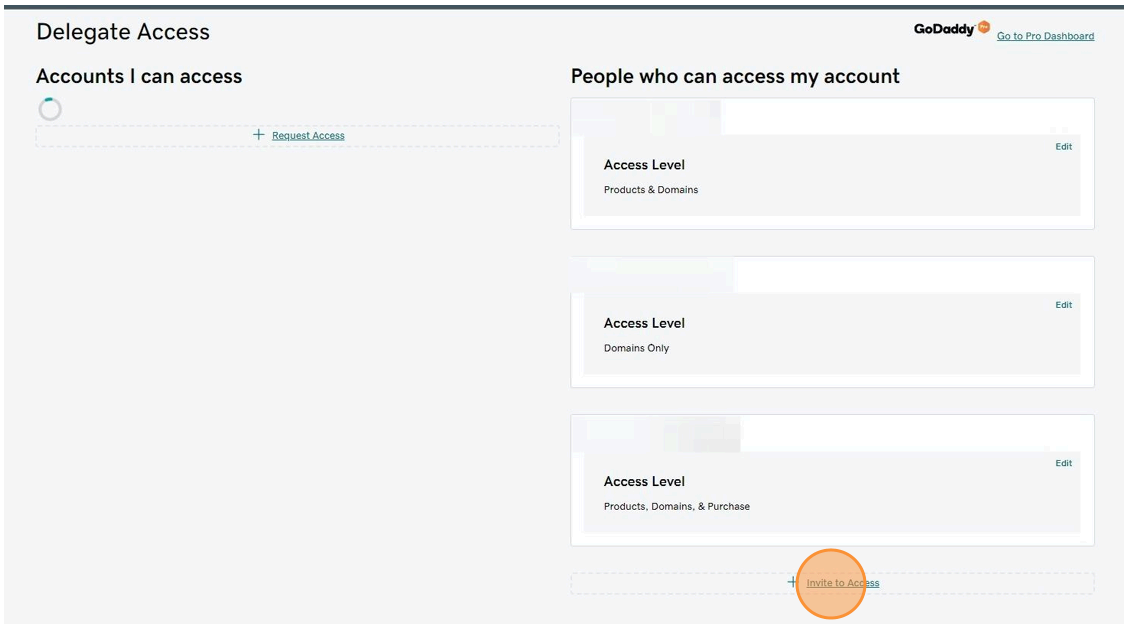
4. Select "Delegate Access".



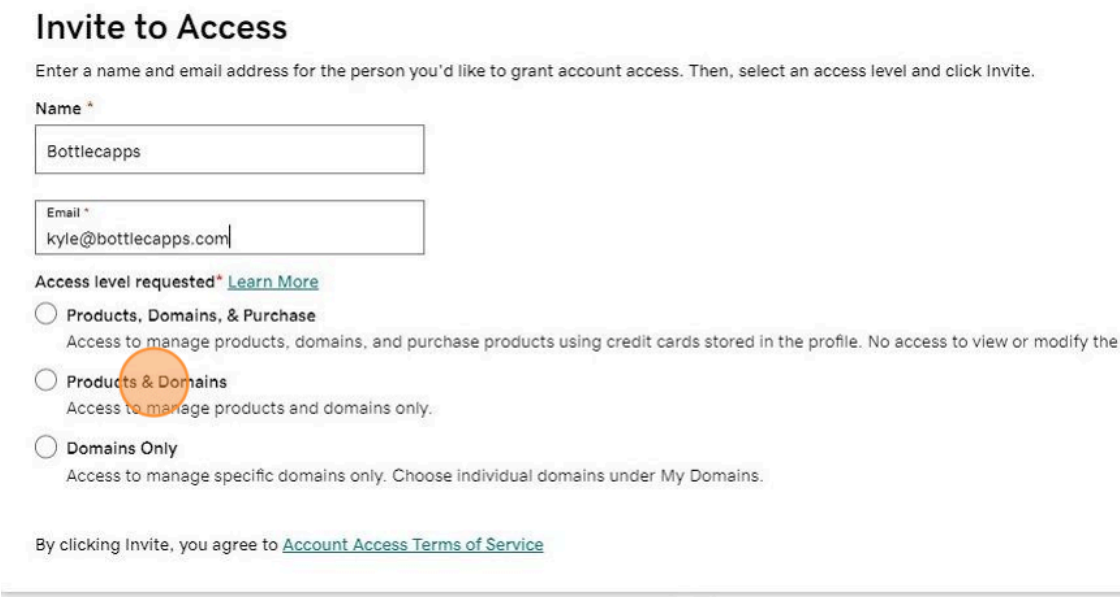
5. If it asks you to sign in again, enter your login details here.



6. You're going to find the "Invite to Access" link on the right side.



7. Enter "**Bottlecapps**" as the name. Enter your Onboarding Manager's name in the email field (Example: **kyle@bottlecapps.com**). Select the "**Products and Domains**" access level.



8. Last thing to do is send the invite!
