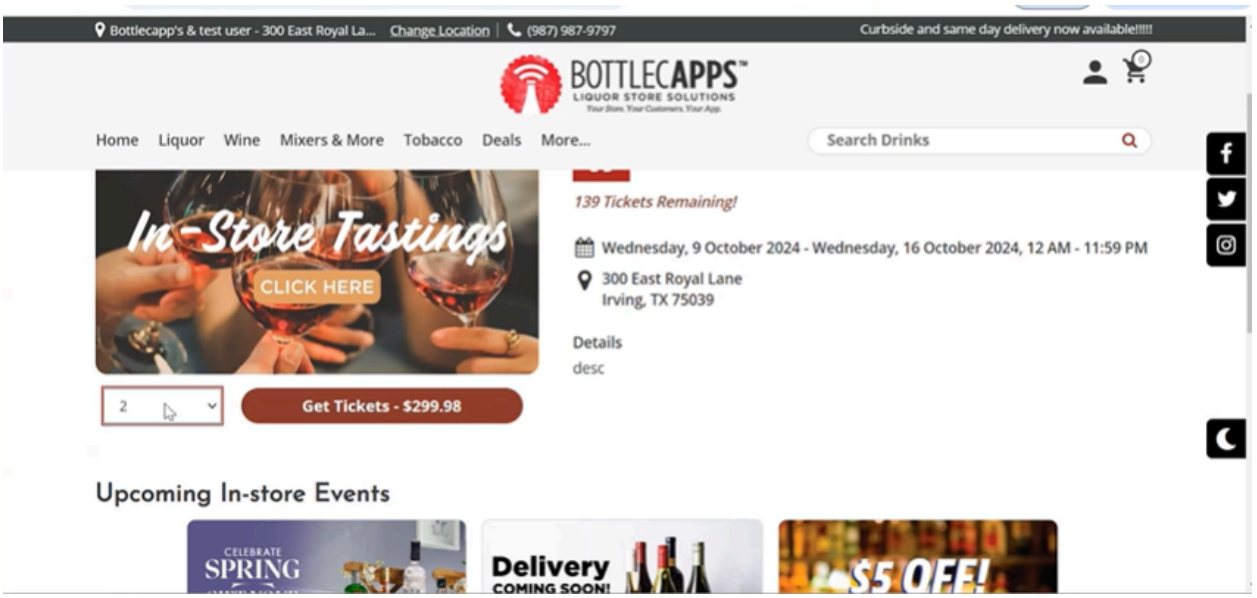
BOTTLECAPPS

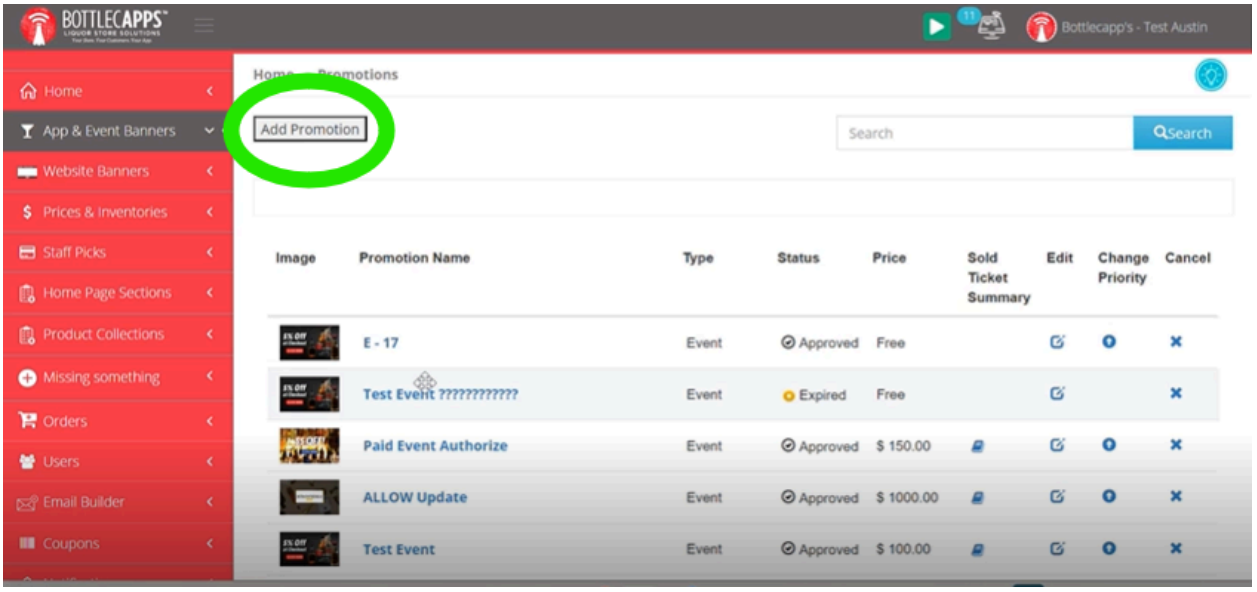
Event Tickets Guide

Event Tickets

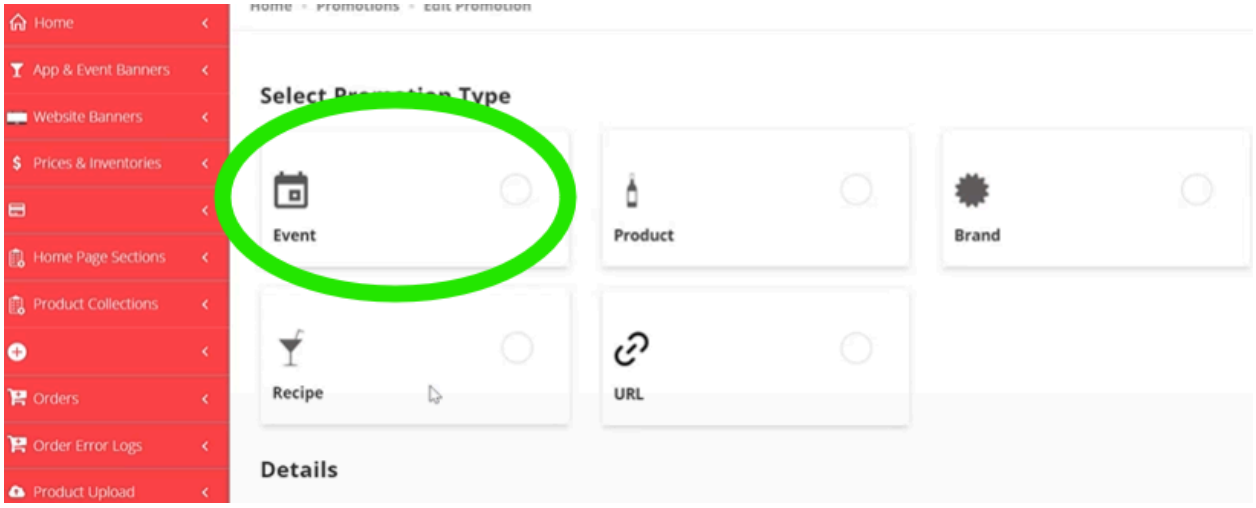
In the Bottlecapps' Webconsole (liquorapps.com), you can now create EVENTS where tickets can be purchased by your customers. Once created, this is what the *customer* sees when they click on the Events page . . .



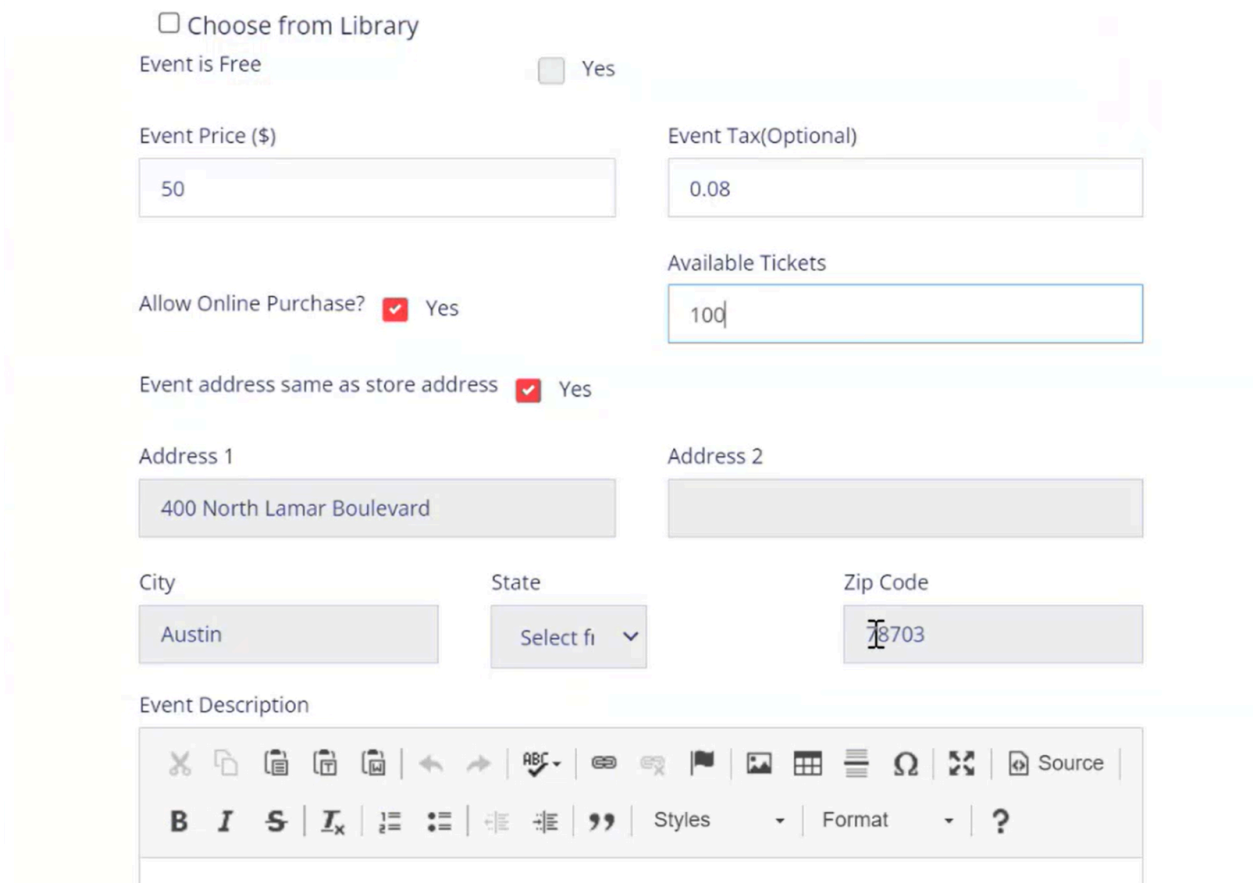
To set this up, click the App & Event Banners Tab and click "Add Promotion" ...



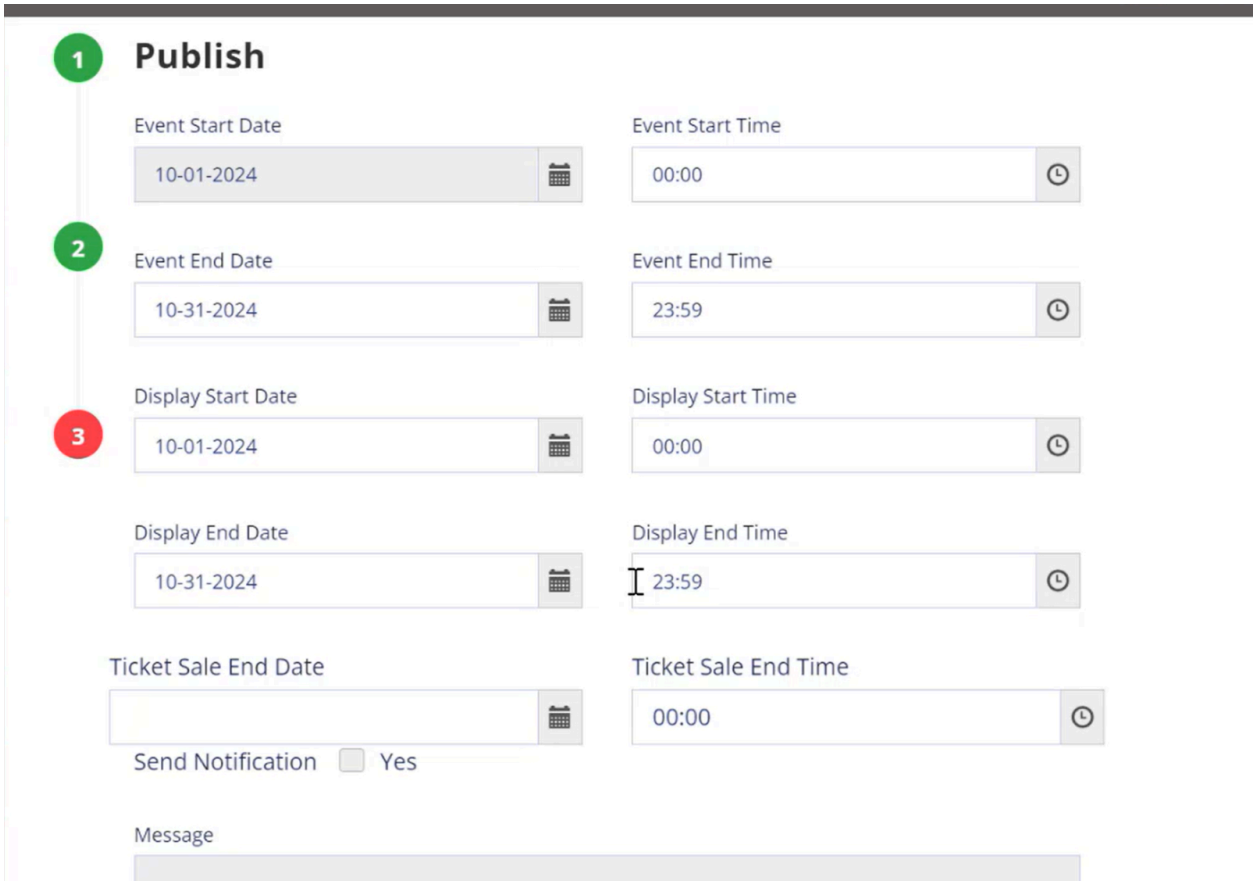
Set it up as a regular Event, like this ...



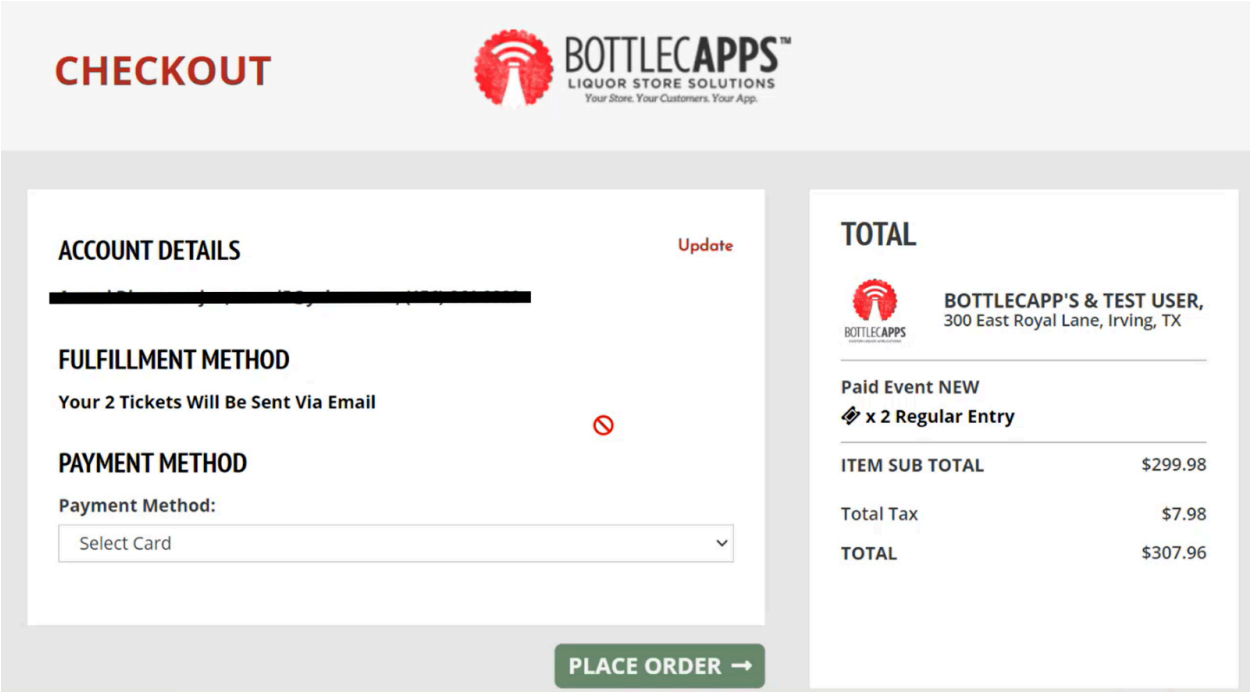
Fill everything out on this page and click “Next” at the bottom ...



On the next page, fill it out, as well. Customers can purchase tickets up until the ***Ticket Sale End Date and Time*** that you choose OR until tickets run out ...



Then click “Publish” and this new Event will show online for your customers. This is what the Checkout Page will look like ...



Tickets will be emailed to the customer. Once the tickets are purchased, there is no cancellation option. The customer will need to reach out to the store for refunds if they cannot attend the Event.

To see a summary of tickets sold, go to this page and click the highlighted area ...
