BOTTLECAPPS

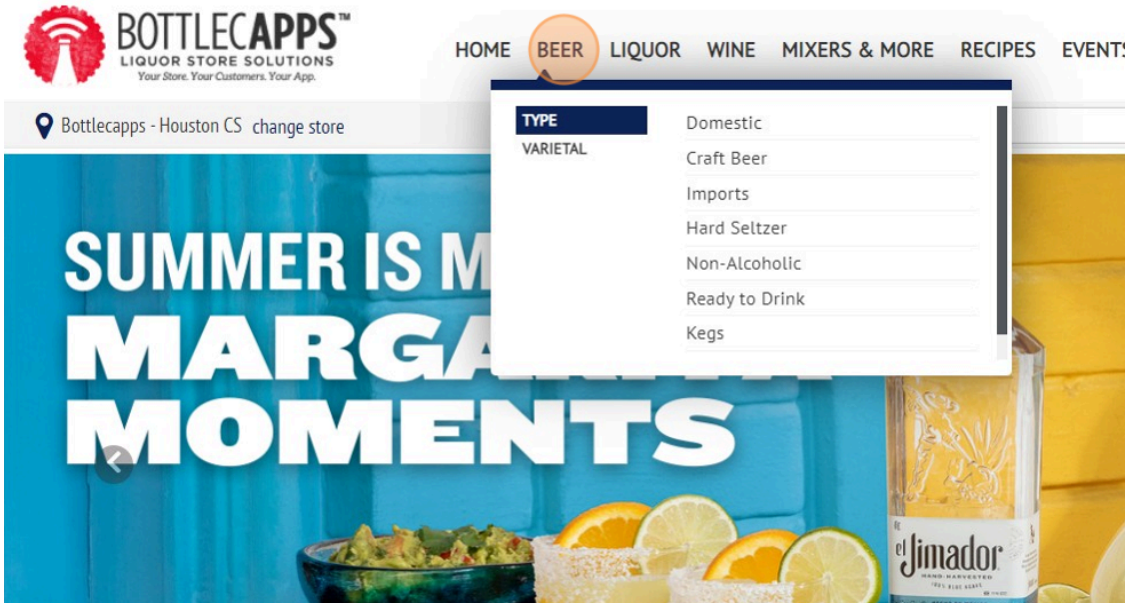
Inventory Approval

Inventory Approval - Guide

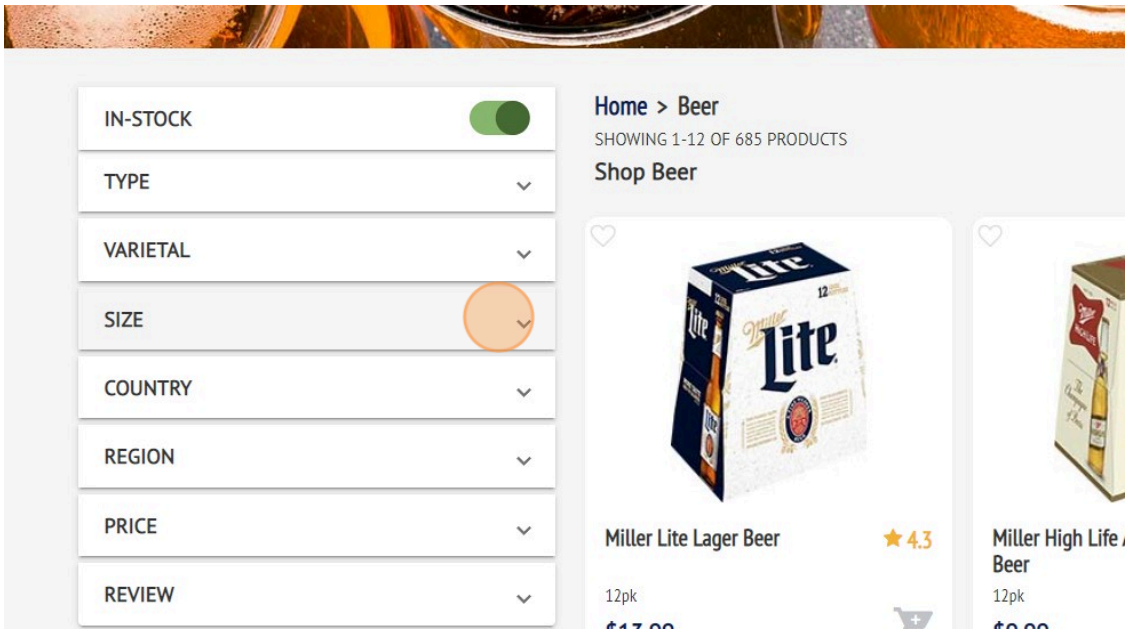
This is a cursory overview of approving your inventory based on prices and sizes**

1. Navigate to https://demo.bottlecapps.com/

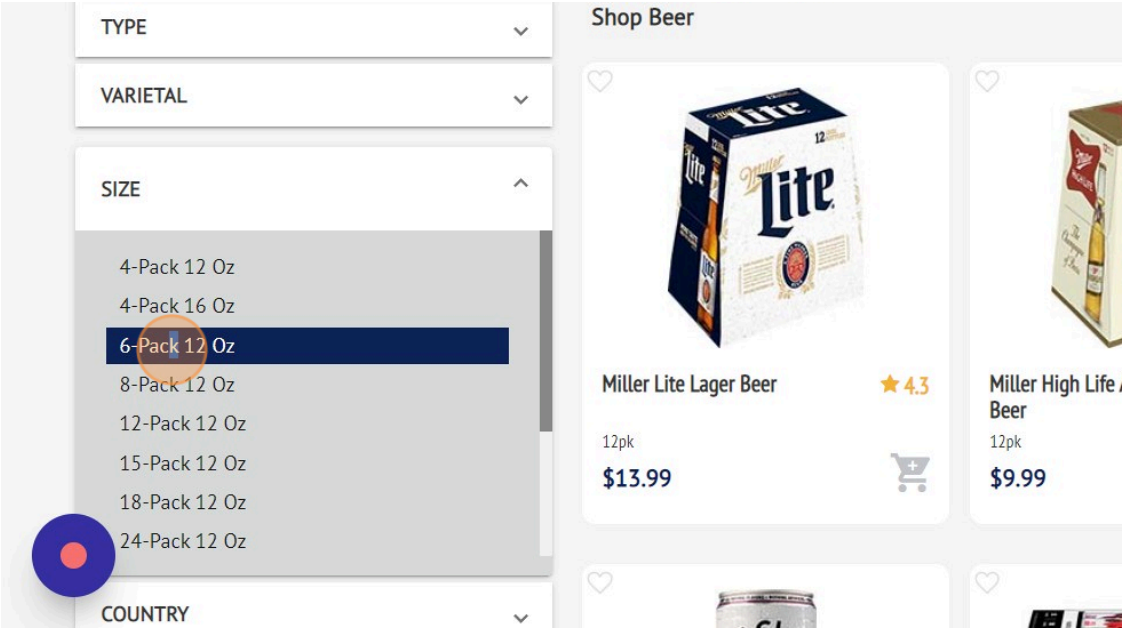
2. Click "BEER"



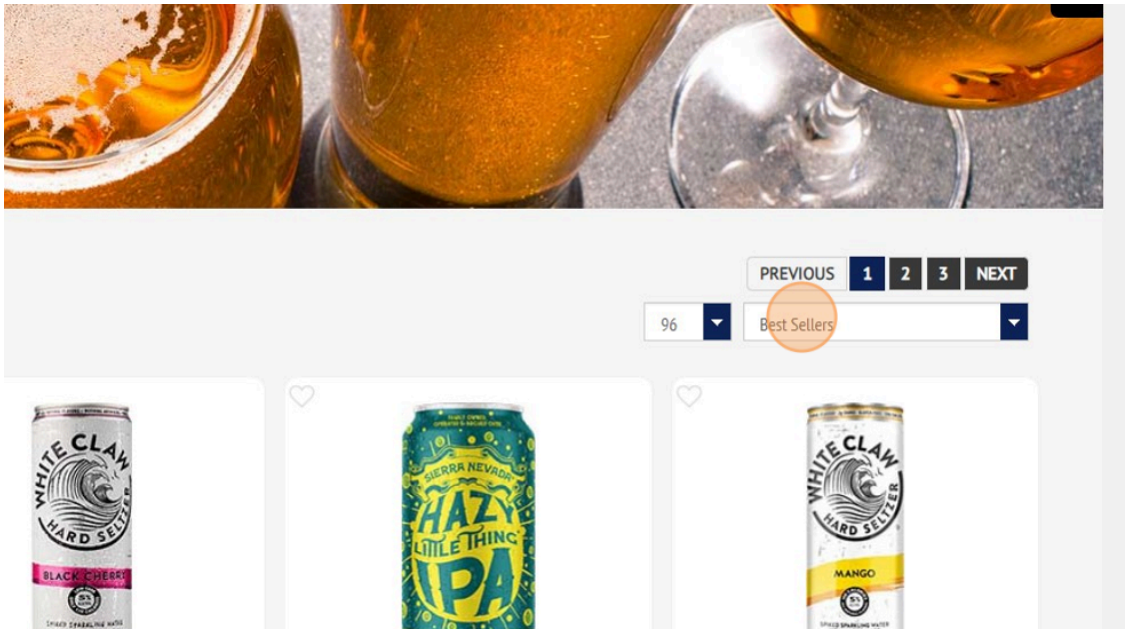
3. Click "SIZE"



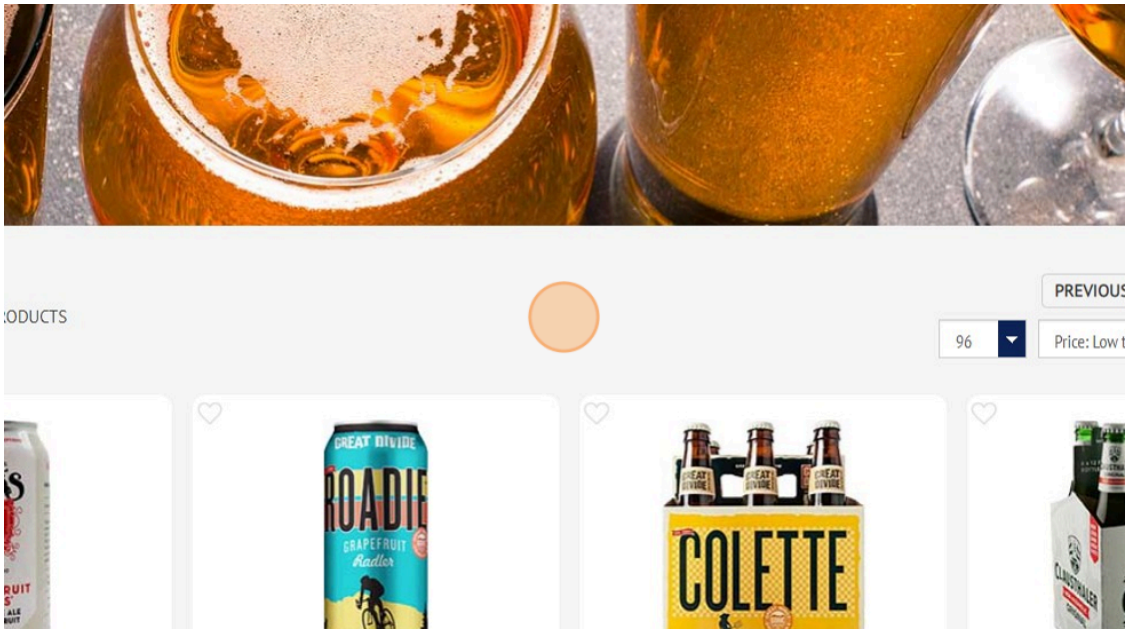
4. Click "6-Pack 12 Oz"



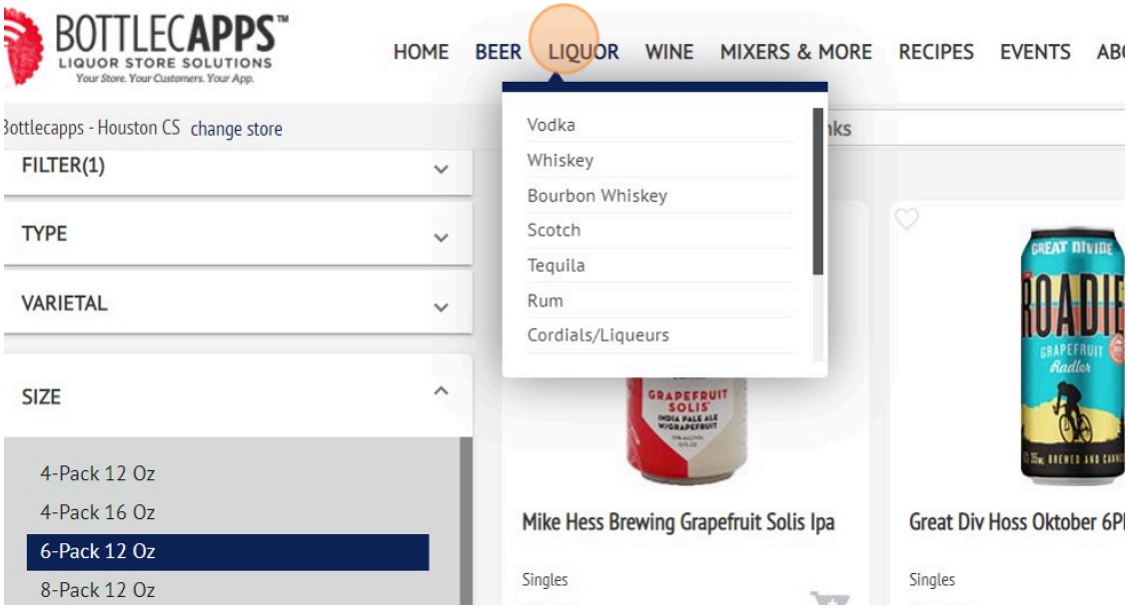
5. Click this dropdown and change to "Price: Low to High"



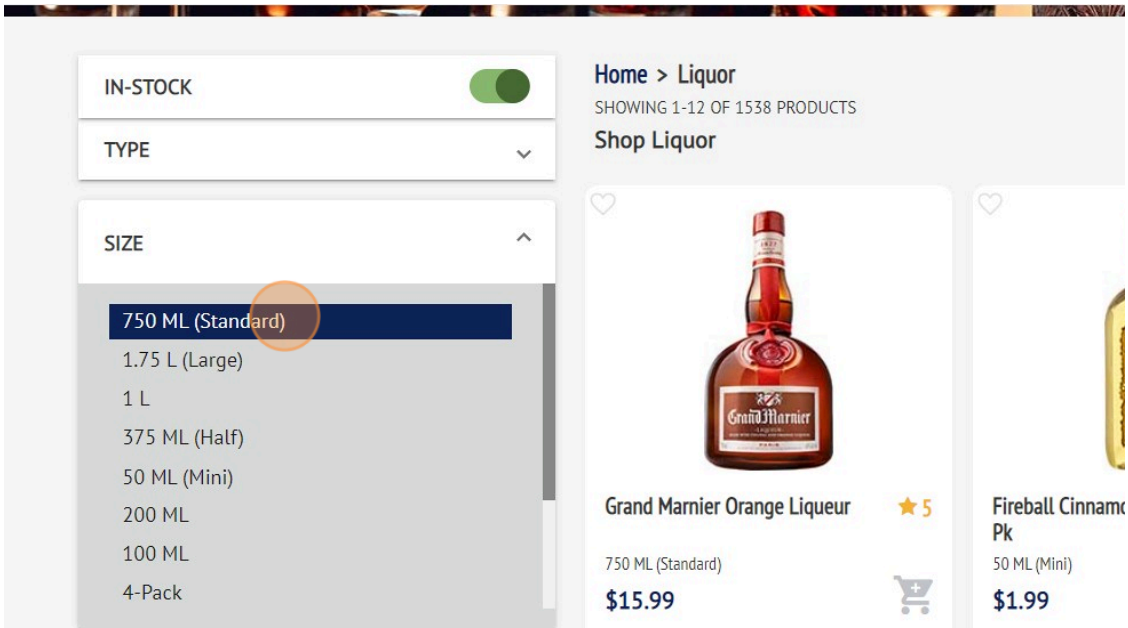
6. Scroll through the page and verify that the prices shown here as "6packs" are your proper prices. If they appear too low, it may be that we are pulling the wrong field.



7. Click "LIQUOR"



8. Click "750 ML (Standard)"



9. Click this dropdown and change to "Price: Low to High". Verify the prices for the Standard Sizes match what you have in your POS. If they are too low, it could be we are applying prices for 50mls to these products.
