Curbside Pickup Guide

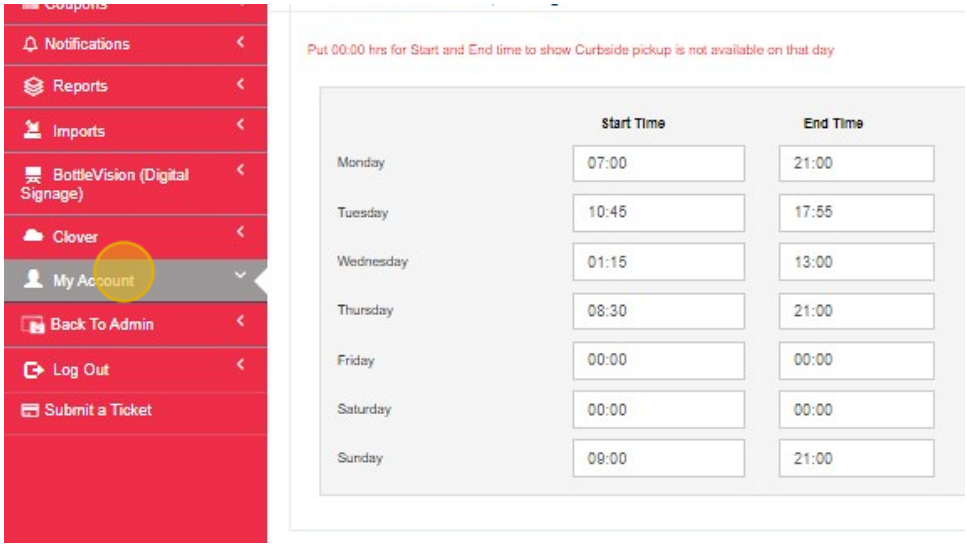
Curbside Pickup is a great tool for customers who want the convenience of ordering ahead of time and having their order ready to pick up, but without having to go inside and wait in line. Staff will simply bring the order right out to the customers' car.

Once an order is marked **Ready for Pickup**, the customer will automatically receive both an **email notification** and a **push notification**. When they open the app or website, they will be prompted to **check in** for their pickup.

They will be asked to provide helpful details such as **vehicle color**, **parking spot**, and any other notes they would like to share. This information instantly appears in the Webconsole (liquorapps.com) so store staff knows the customer has arrived and can bring out the order.

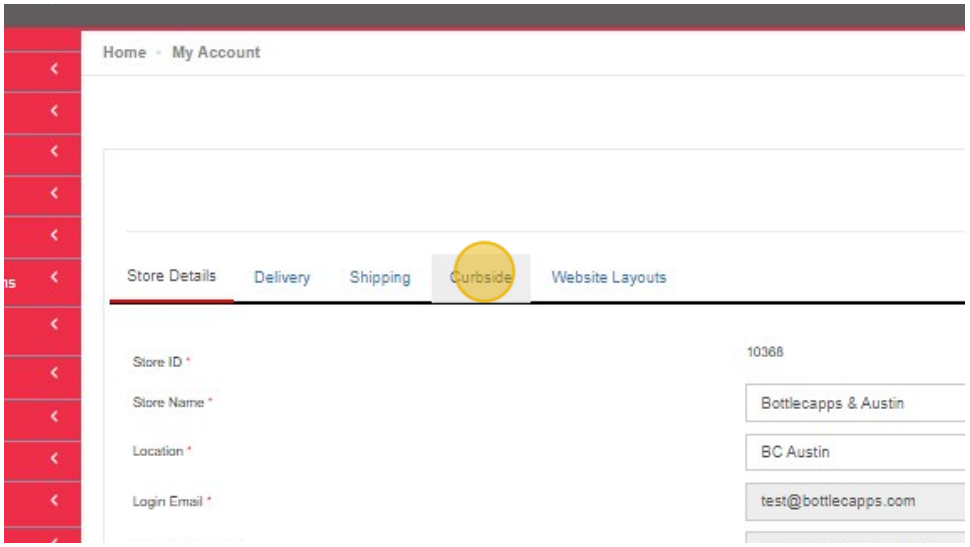
1. Navigate to https://liquorapps.com

2. Click "My Account"

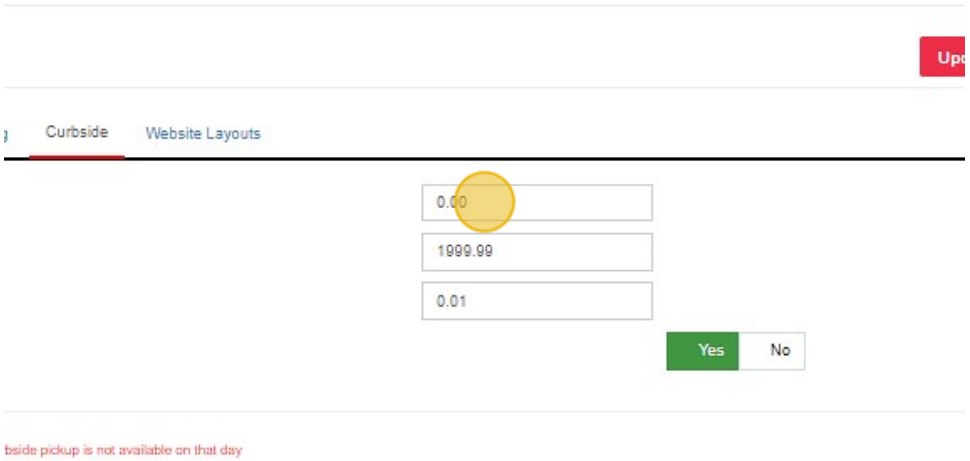


3. Click "Yes" on “Enable Curbside?” on the My Account Tab

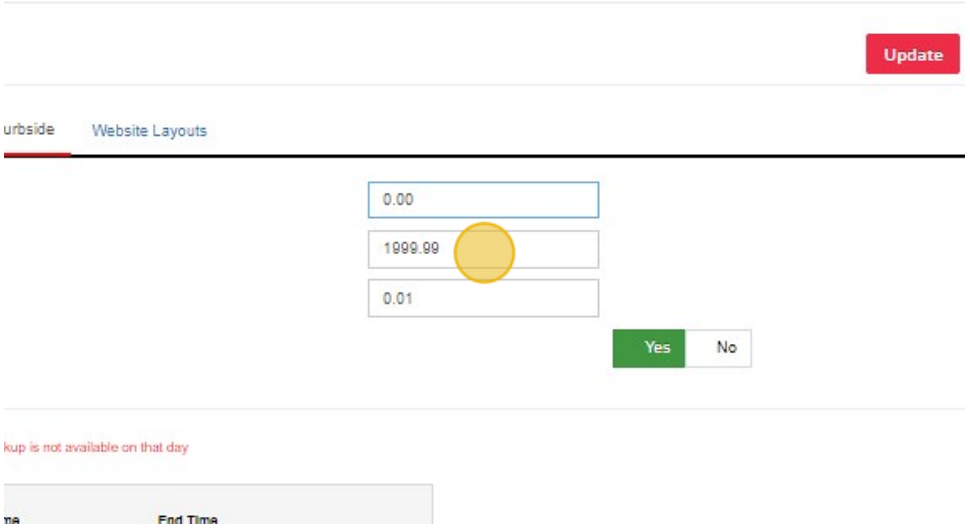
4. Click the "Curbside" Tab



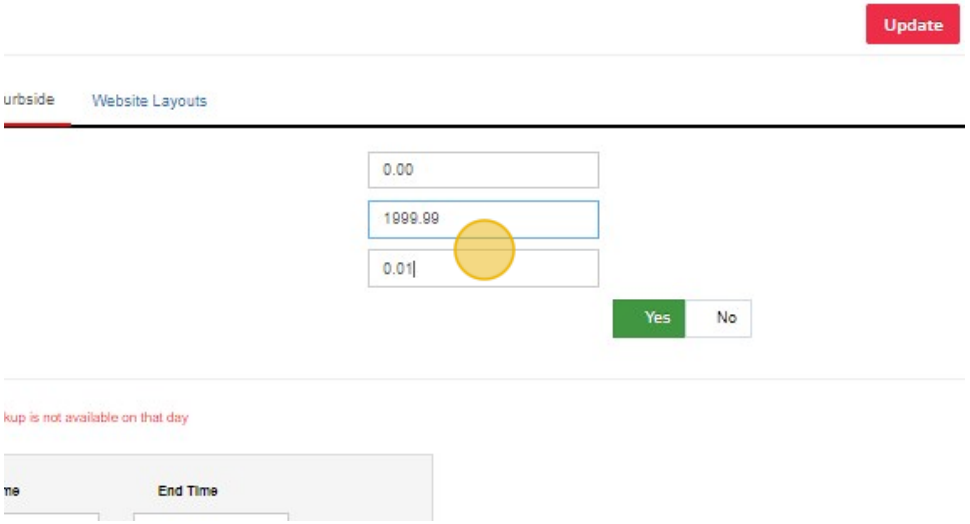
5. Update Minimum Order Amount for Curbside



6. Update Maximum Order Amount for Curbside.



7. Update Curbside Convenience Fee



8. “Is Enable Curbside Slots” will give you the ability to limit the number of orders you receive in a certain time slot
